

Product Feature: Dashboards

Join the dots across your CX and Marketing

Orlo's Dashboards are your organisation's command centre - the central hub that allows you to view data from across your marketing and customer service activities, giving you high level insight in an instant. Easily understand how you're performing, identify trends, learn where you can improve and take action in the moment.

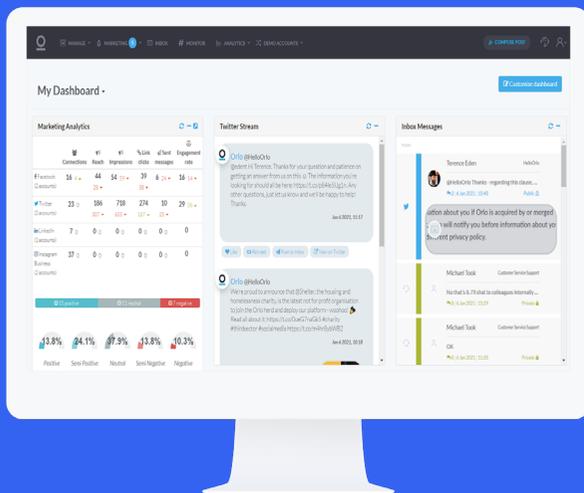

Paint your own picture

Start with the perfect blank canvas and make it your own by choosing the layout you want and then adding your widgets, it's that simple! Whether you want to see your Inbox, Outbox, Marketing Analytics or Social Listening streams, just add them in, choose your accounts and date fields and you're ready to rock and roll.

Aaaaaand action!

Dashboards aren't just for getting your teams ready for their close ups, you can take action too, without the need to dive into individual modules. Not only can you like, share and create your own post, but you can also push messages to your Inbox and assign them to your teams all from one screen. And that's just the tip of the iceberg!

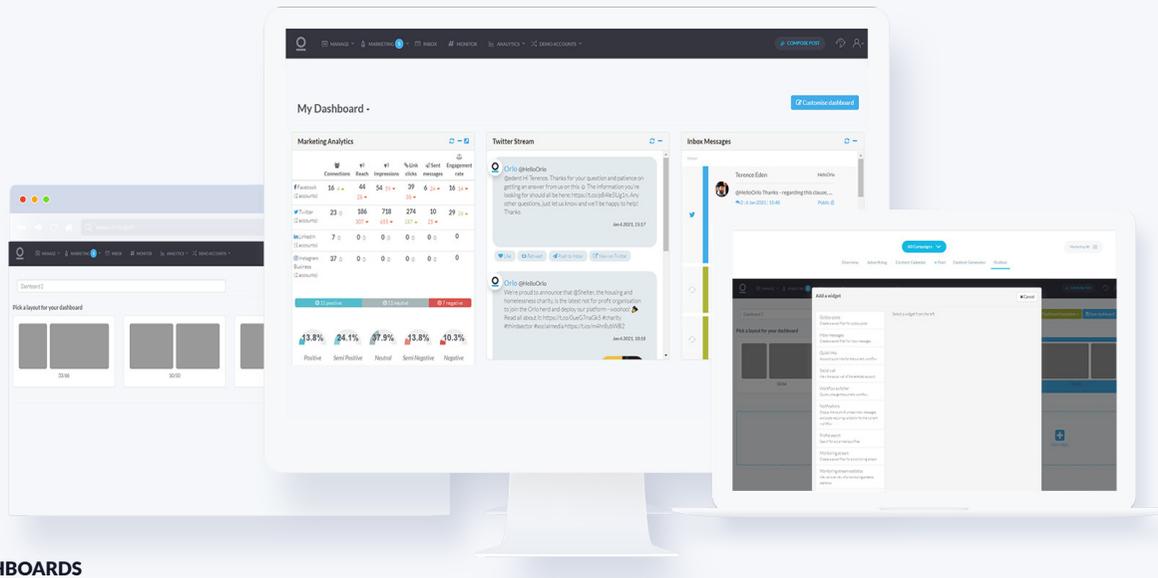

Change it up

In charge of different teams with different priorities and metrics? No problem! You can create and save multiple Dashboards, each with a unique layout and Workflow, allowing you to quickly and easily switch hats! Plus, you can save Dashboard templates for your teams to access and use, so you're always on the same page.

Find the key to success

Bring Social Listening data and insights directly into your Dashboard so you can see impactful information but on the small screen! Plug in your social listening stats, or create and monitor a new stream filter directly from your Dashboard - your high level overview just got way more sophisticated!

Join the herd

Want to find out more or see our platform in action?

There's always a member of Team Orlo who's happy to have a chat, answer any questions and welcome you to the Orlo herd!
